EXPERIENCE

VocaHQ • Remote
Full Time • Open-Source Product Engineer — Mar' 26 - Present
- Building VocaHQ, the open-source family of offline speech-to-text apps for Linux, macOS, Windows, iPhone and Android (1,100+ GitHub stars across the family).
- Shipping VocaPhone to Google Play and TestFlight: a Kotlin system keyboard and a Swift keyboard extension running on-device speech recognition in 54 languages.
- Designing privacy-first processing with on-device transcription by default, plus VocaGateway, an optional self-hosted Python gateway with an OpenAI-compatible API.
- Leading product direction, user experience, documentation, release delivery and public communication across the Voca ecosystem, developed in the open.

Umbrel • Remote
Contract • Senior Software Engineer, Umbrel App Store — Oct' 25 - Feb' 26
- Reviewed, tested and validated app submissions for the Umbrel App Store for reliability, security and umbrelOS compatibility: 30+ merged pull requests and 28 reviews.
- Built an agentic testing workflow that automated testing of umbrelOS apps, cutting manual review from hours to minutes per app and speeding up release cycles.
- Identified, reproduced and documented bugs across apps, and worked with the engineering team to resolve umbrelOS-level issues affecting app performance.
- Improved app submission guidelines and testing standards for app developers.

Independent • Remote
Open-Source Engineer — July' 24 - Sep' 25
- Contributed to python/typeshed and Robyn (20 merged pull requests to date), covering standard-library type stubs and CI tooling.
- Built and published developer tools including bitssh and VentoyDocker.

Samagra • Remote
Internship • Software Development Intern, WFC 2024 — Feb' 24 - June' 24
- Selected for Samagra's WFC cohort as an SDE intern with SamagraX, building Digital Public Goods and open-source building blocks for civic-tech products.

Google • London, UK
Internship • Python Engineer — July' 23 - Nov' 23
- Integrated Google Cloud Platform services into the Google Bard Workspace integration, working with the GCP services and API teams.
- Rewrote part of the Workspace integration API, adding mypy type checks and tests.
- Set up monitoring and logging for a submodule to catch production issues proactively.

PROJECTS

VocaMac • Offline voice-to-text for macOS — *Swift, SwiftUI, WhisperKit, CoreML*
- Created VocaMac and lead its development: a menu-bar dictation app where you hold a hotkey, speak, and the text is typed at the cursor, processed on-device.
- Shipped Whisper and Parakeet engines on CoreML, per-app writing styles and a voice Command Mode; distributed via Homebrew with in-app auto-updates.

Robyn • Async Python web framework with a Rust runtime — *Rust, Python, Actix*
- 6 merged pull requests: moved the CI pipelines and docs to uv, improved the CLI and refactored error codes.

typeshed • Python's official collection of type stubs
- 14 merged pull requests fixing stubs for the standard library (argparse, socket, ctypes, tarfile, difflib) and third-party packages (psutil, networkx, BeautifulSoup).

bitssh • Terminal UI for SSH connections — *Python, Docker*
- Built a terminal UI that lists hosts from the SSH config, connects through fuzzy search and adds or removes hosts with guided prompts; published on PyPI and Docker Hub.

VentoyDocker • Run Ventoy on macOS via Docker — *Shell, Docker, QEMU*
- Built a Docker and qemu-nbd workflow that lets macOS users create Ventoy bootable USB drives, with the VentoyWeb UI and CLI.

pyladiescon-portal • PyLadiesCon conference portal — *Python, Django, JavaScript*
- Collaborated on a web portal that replaced spreadsheets for PyLadiesCon operations.

SKILLS

Languages
Python, Swift, Kotlin, Rust, Go, TypeScript, JavaScript, C, Shell

Frameworks / Libraries
FastAPI, Flask, Django, SwiftUI, React, Next.js, Node.js, Tailwind CSS

On-device ML
WhisperKit, CoreML, sherpa-onnx, ONNX Runtime

Tools
Docker, Podman, Kubernetes, Ansible, Terraform, Linux, Git, GitHub, GitLab

Databases
PostgreSQL, MongoDB, Redis

EDUCATION

B.Tech • Computer Science and Engineering
KIET Group of Institutions - AKTU • Delhi NCR

VOLUNTEER EXPERIENCE

Navigator
Djangonaut Space
- Mentor new contributors to Django as a Navigator in the community's open-source mentorship programme.
- Joined as a Djangonaut in Session 6.

Conference Volunteer
PyCon Italia • 2024
- Served on the Diversity & Inclusion team to increase participation from underrepresented groups, and helped find event sponsors.

Meetup Organizer
PyWorldWide
- Founded PyWorldWide, an online community for Python enthusiasts of all levels, and organise its monthly virtual meetups.

TALKS

PyCon France • 2023
- Delivered the talk **From a Python Script to an Open-Source Project.**

FOSS United Delhi • 2022
- Spoke on a **panel** about getting started with open source.
